SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

MEMORANDUM

DATE: August 11, 1983
TO: All Technical Personnel
FROM: Sanford M. Weiss, Director of Engineering /s/ SMW
SUBJECT: Emission Reduction Credits

On August 4, 1983, I issued a memo with respect to emission reduction credits. In that memo I explained that it is necessary that EPA allow shutdown credits. While emission reductions through shutdowns can be placed into the bank, Rule 1309(d) limits the use of those shutdowns. For that reason, the following condition must be placed on all emission reductions which result from shutdowns and which are to be banked.

This emission reduction credit is a result of equipment shutdowns and may be used only after the Executive Officer has verified that such use would meet all federal requirements regarding emission reduction credits and emission offset eligibility.
